

# First Aid

This course teaches basic medical training aimed at providing immediate assistance to persons suffering minor or serious illnesses. This course prepares the student to administer basic medical care used to stabilize a person with an accidental injury. Students will learn First Aid skills necessary to preserve life, prevent worsening complications, and promote healing and recovery until additional medical help can be provided.

Education... A journey that begins with a leap of Faith!

# CPR/BLS

A medical certification for people working in the medical field. It teaches enhanced life support skills and training in order to stabilize patients who have suffered from cardiac related accidents that may affected the patient's heart and lung functions. Cardiopulmonary Resuscitation (CPR)/ Basic Life Support (BLS) is taught using a scenario-based approach to develop critical thinking and problem-solving skills for students in order to perform life saving measures on patients in the event of an accident.
